Interactive Public GIS The Interactive GIS provides access to the City's zoning, property information and record cards, conservation data, and historic properties in addition to a number of other data layers.

Geographic Information Systems (GIS) | Chicopee, MA

A geographic information system (GIS) is a system designed to capture, store, manipulate, analyze, manage, and present spatial or geographic data. GIS applications are tools that allow users to create interactive queries (user-created searches), analyze spatial information, edit data in maps, and present the results of all these operations.

Geographic information system - Wikipedia

Geography is the study of how the world differs from place to place. Geography uses a spatial, or geospatial perspective, meaning it focuses on place and space, looking at what, where and why phenomena occur.

CDC - GIS (Geographic Information Systems)

The GIMS (Geographical Information Management System) project began in FY 89/90. It grew out of the central Iowa regional partnership (CIAM) that maintained traditional non-attributed photogrammetry linework. i.e. edge of pavement, building footprints, hydrology, etc.

The shapefile format is a popular geospatial vector data format for geographic information system (GIS) software. It is developed and regulated by Esri as a (mostly) open specification for data interoperability among Esri and other GIS software products. The shapefile format can spatially describe vector features: points, lines, and polygons, representing, for example, water wells, rivers, and ...
