Recommendations for end-of-life care in the intensive care

Injury, also known as physical trauma, is damage to the body caused by external force. This may be caused by accidents, falls, hits, weapons, and other causes. Major trauma is injury that has the potential to cause prolonged disability or death.. In 2013, 4.8 million people died from injuries, up from 4.3 million in 1990. More than 30% of these deaths were transport-related injuries.

Injury - Wikipedia

Foreword by Professor David Thompson In an era of the so-called "knowledge economy", the concept of "lifelong learning" and the belief that "education matters", there is a need to ensure that skills (be they basic,
