In macroeconomics, sterilization is action taken by a country's central bank to counter the effects on the money supply caused by a balance of payments surplus or deficit. This can involve open market operations undertaken by the central bank whose aim is to neutralize the impact of associated foreign exchange operations. The opposite is unsterilized intervention, where monetary authorities ...

Public economics (or economics of the public sector) is the study of government policy through the lens of economic efficiency and equity.. At its most basic level, public economics provides a framework for thinking about whether or not the government should participate in economic markets and to what extent it should do

so.
