Antiperspirants And Deodorants 2nd Edition Cosmetic

Deodorants, not to be confused with antiperspirants, are cosmetics and do not typically contain any aluminum-type salt complexes. Antiperspirants are associated with few dermatologic issues; slightly irritating under certain conditions, but not scientifically associated with breast cancer or Alzheimer disease.

Antiperspirants and Deodorants - Cosmetic Dermatology

Antiperspirants work by blocking the sweat ducts (2) whereas most deodorants inhibit or kill the bacteria responsible for producing body odour and/or cover the odour with a fragrance (4, 6).
