STANDARD SPECIFICATIONS - Caltrans

Visual-weld-inspection consists in the immediate critical observation of the external features visible on all welds.. It is the first and most important quality assessment to be performed as soon as the welding operations are accomplished.. Other inspection procedures may be required to detect discontinuities not visible to the eye or present below the external surface.

Visual-weld-inspection for first quality assessment

The following tables compare general and technical information for a number of relational database management systems.Please see the individual products' articles for further information.
