Neuroscience (or neurobiology) is the scientific study of the nervous system. It is a multidisciplinary branch of biology, that combines physiology, anatomy, molecular biology, developmental biology, cytology, mathematical modeling and psychology to understand the fundamental and emergent properties of neurons and neural circuits. The understanding of the biological basis of learning, memory ...

Henry James wrote that criticism showed the mind engaged in "reaching out for the reasons of its interest," and A. O. Scott, a chief film critic at The New York Times, says something similar toward the end of "Better Living Through Criticism," his lively and argumentative book: "Let's say that a critic is a person whose interest can help to activate the interest of others."

Review: In "Better Living Through Criticism," A.O. Scott
