La biología cellulare o citología (dal greco kytos = "contenitore" e logos = "studio") è la branca della biologia che studia la cellula dal punto di vista morfologico (studio strutturale, ad esempio, nucleo, dei ribosomi o dei vari organuli) e funzionale (studio dei processi fondamentali come il ciclo cellulare o la riproduzione). Gli approcci della citologia sono sia a livello microscopico ...

L'istologia (dal greco ἵστος, ἱστός, (histós), tela e ἵστον, ἵστῳ, (ístos), studio) è la branca della biologia che studia i tessuti vegetali e animali. L'istologia viene applicata nella medicina, dove riveste un ruolo importante nell'anatomia patologica e nella descrizione dei fenomeni morbosi, essenziale anche per le analisi pre- e post-operatorie in ambito medico e chirurgico.
