Parasitology is the study of parasites, their hosts, and the relationship between them.As a biological discipline, the scope of parasitology is not determined by the organism or environment in question but by their way of life.This means it forms a synthesis of other disciplines, and draws on techniques from fields such as cell biology, bioinformatics, biochemistry, molecular biology ...

### **Parasitology - Wikipedia**

Biological hazards, also known as biohazards, refer to biological substances that pose a threat to the health of living organisms, primarily that of humans.This can include samples of a microorganism, virus or toxin (from a biological source) that can affect human health.It can also include substances harmful to other animals.
