CALL FOR PAPERS FOR BRACHYTHERAPY: Brachytherapy is a bi-monthly peer-reviewed journal focusing on brachytherapy and radiation oncology. Brachytherapy will be releasing a special edition focusing on intraoperative radiation therapy as well as electronic brachytherapy for the May-June 2019 edition in conjunction with guidelines from the American Brachytherapy Society on these two techniques.

Brachytherapy Home Page - brachyjournal.com

Mission Statement. The mission of the ABS is to benefit patients by providing information directly to the consumer, by promoting the highest possible standards of practice of brachytherapy, and to benefit health care professionals by encouraging improved and continuing education for radiation oncologists and other health care professionals involved in the treatment of cancer.

Home - American Brachytherapy Society

Brachytherapy is a form of radiotherapy where a sealed radiation source is placed inside or next to the area requiring treatment. Brachytherapy is commonly used as an effective treatment for cervical, prostate, breast, and skin cancer and can also be used to treat tumours in many other body sites. Treatment results have demonstrated that the cancer-cure rates of brachytherapy are either ...

Brachytherapy - Wikipedia

Brachytherapy is a type of radiotherapy, or radiation treatment, offered to certain cancer patients. There are two types of brachytherapy – high dose-rate (HDR) and low dose-rate (LDR). LDR brachytherapy is the type that is most commonly used to treat prostate cancer; it may sometimes be referred to as 'seed implantation' or it may also be called 'pinhole surgery'.

Prostate brachytherapy - Wikipedia

Convenience: Since brachytherapy is an outpatient procedure, no hospital stay is required. Furthermore, the seed implant is complete in one visit whereas a number of months are required to complete a course of external beam radiation.

International Journal of Radiation Oncology & Biology

x In this study, we investigated the efficacy and safety of I-125 seed implantation for the treatment of recurrent head and neck cancer after EBRT. The results indicated I-125 seed implantation is an acceptable salvage therapy, with 1-year local control rate of 40.6% and 5-year local control rate of 26.6%.

THE ROLE OF A PHYSICIST IN RADIATION ONCOLOGY

This publication is written for students and teachers involved in programmes that train medical physicists for work in diagnostic radiology. It provides, in the form of a syllabus, a comprehensive overview of the basic medical physics knowledge required for the practice of modern diagnostic radiology.
