The world is changing fast and BP is changing with it. The mix of energy that provides heat, light and mobility for billions of people is shifting towards lower carbon sources, driven by advances in technology and growing concerns about climate change.

## **BP**

1. Introduction. According to WWF (2016), the world is using the equivalent of 1.6 planets to support human activities. The finding highlights that there is a huge gap between natural resource supply and human demand. This also indicates that human beings need to live a more sustainable lifestyle (Mont et al., 2014), to ensure a sustainable living environment.
