Mathematics arises from many different kinds of problems. At first these were found in commerce, land measurement, architecture and later astronomy; today, all sciences suggest problems studied by mathematicians, and many problems arise within mathematics itself. For example, the physicist Richard Feynman invented the path integral formulation of quantum mechanics using a combination of ...

Irrational Number. An irrational number is a number that cannot be expressed as a fraction for any integers and .Irrational numbers have decimal expansions that neither terminate nor become periodic. Every transcendental number is irrational.. There is no standard notation for the set of irrational numbers, but the notations  $\mathbb{R}$ ,  $\mathbb{R} \setminus \mathbb{Q}$ , or  $\mathbb{R} \setminus \mathbb{Q}$ , where the bar, minus sign, or backslash indicates the set ...

Discrete mathematics is the study of mathematical structures that are fundamentally discrete rather than continuous. In contrast to real numbers that have the property of varying "smoothly", the objects studied in discrete mathematics "are" such as integers, graphs, and statements in logic "do not vary smoothly in this way, but have distinct, separated values.
