### **Multilayer Ceramic Capacitors - Performance Characteristics**

Film capacitors, plastic film capacitors, film dielectric capacitors, or polymer film capacitors, generically called â€œfilm capsâ€“ as well as power film capacitors, are electrical capacitors with an insulating plastic film as the dielectric, sometimes combined with paper as carrier of the electrodes.. The dielectric films, depending on the desired dielectric strength, are drawn in a special ...

### **Surface Mount Multilayer Ceramic Chip Capacitors (SMD)**

In a conventional capacitor, the electric energy is stored statically by charge separation, typically electrons, in an electric field between two electrode plates. The amount of charge stored per unit voltage is essentially a function of the size of the plates, the plate material's properties, the properties of the dielectric material placed between the plates, and the separation distance (i.e ...
