Numerical Simulation of Wind Flow and Pollution Transport in Urban Street Canyons . Trong Nhan Nguyen. 1, Thanh Chuyen Nguyen. 2. and Van Thinh Nguyen

Numerical Simulation of Wind Flow and Pollution Transport

Computer simulation is the reproduction of the behavior of a system using a computer to simulate the outcomes of a mathematical model associated with said system. Since they allow to check the reliability of chosen mathematical models, computer simulations have become a useful tool for the mathematical modeling of many natural systems in ...

Computer simulation - Wikipedia

The present paper proposes an adapted sub-grid scale modeling to predict the pressure drop of square- and hexagonal-cell-shaped honeycomb monolith structures in an

Pressure Drop Analysis of Square and Hexagonal Cells and

In this work, the recently developed moment projection method (MPM) is coupled with the Stochastic Reactor Model engine code to simulate the formation of soot in a direct injection diesel engine.

Modelling of soot formation in a diesel engine with the

Geometry and classification. Ideally a street canyon is a relatively narrow street with tall, continuous buildings on both sides of the road. But now the term street canyon is used more broadly and the geometrical details of the street canyon are used to categorize them.

Street canyon - Wikipedia

The mission of the Department of Mechanical Engineering, National Institute of Technology Silchar is as follows: To impart instruction, training and awareness to students to meet the technological and socio-economical needs of the country;
