Tool management is needed in metalworking so that the information regarding the tools on hand can be uniformly organized and integrated. The information is stored in a database and is registered and applied using tool management. Tool data management consists of specific data fields, graphics and parameters that are essential in production, as opposed to managing general production equipment.

I'm just about going to get my feet wet with a new CNC gang tool lathe with a Fancu controller. I'm wondering if anyone knows of a G-code chart or reference that identifies and spells out all the parameters and syntax for the different codes and which parameters are optional. I know that some codes have none but others have lots, e.g. G73 with X, Y, Z, R, L, Q, A, B, C, ad nauseum.
