Construction and Building Materials - Journal - Elsevier

The role of a contractor. Contractors are assigned to a construction project during the design or once the design has been completed by a licensed architect. This is done by going through a bidding process with different contractors. The contractor is selected by using one of three common selection methods: low-bid

selection, best-value selection, or qualifications-based selection.

Construction management - Wikipedia

This is a list of building materials. Many types of building materials are used in the construction industry to create buildings and structures.. These categories of materials and products are used by architects and construction project managers to specify the materials and methods used for building projects..
