Foundations and Trends in Signal Processing Vol. 1, Nos. 1-2 (2007) ©194 c 2007 L. R. Rabiner and R. W. Schafer DOI: 10.1561/2000000001 Introduction to Digital Speech Processing

Introduction to Digital Speech Processing - IAUN

In signal processing, a digital filter is a system that performs mathematical operations on a sampled, discrete-time signal to reduce or enhance certain aspects of that signal. This is in contrast to the other major type of electronic filter, the analog filter, which is an electronic circuit operating on continuous-time analog signals.. A digital filter system usually consists of an analog-to ...

Digital filter - Wikipedia

FIR filter was directly designed by using digital signal processing toolbox FDATool of MATLAB7.1 in [2]. The FDATool interface was opened in the MATLAB7.1

A neuron, also known as a neurone (British spelling) and nerve cell, is an electrically excitable cell that receives, processes, and transmits information through electrical and chemical signals. These signals between neurons occur via specialized connections called synapses. Neurons can connect to each other to form neural pathways, and neural circuits.
