Triage (/ ˈtriːdʒ, ˈtriːdʒ/) is the process of determining the priority of patients' treatments based on the severity of their condition. This rations patient treatment efficiently when resources are insufficient for all to be treated immediately. The term comes from the French verb trier, meaning to separate, sift or select. Triage may result in determining the order and ...

You want to control your diabetes as much as possible. You wouldn't be reading this if you didn't. So you regularly check your A1C level. This is the best measurement of our blood glucose control that we have now.

The Normal A1C Level - Diabetes Developments

Aluminum phosphide is a dark gray or dry, yellow, crystalline solid. It reacts with moisture to give phosphine, a flammable and poisonous gas. Normally, phosphine will spontaneously ignite upon contact with air. If there is an excess of water, the phosphine fire will not normally ignite any surrounding combustible material.
