PDF™ Endosonography, 3e by Robert H. Hawes MD, Paul

A technology offered at the Cleveland Clinic known as endoscopic ultrasound involves a special endoscope (an instrument used to view the inside of the body) with a sound wave transducer at the tip. As the endoscope is passed inside the body, it allows ultrasound examination of the esophagus, stomach, pancreas, bile duct, and colon with far greater detail than that which can be obtained from outside the body.
