THE BASICS ABOUT TORNADOES. What is a tornado? According to the Glossary of Meteorology (AMS 2000), a tornado is "a violently rotating column of air, pendant from a cumuliform cloud or underneath a cumuliform cloud, and often (but not always) visible as a funnel cloud." The wording of other definitions may vary, but one constant is this: a tornado must be in contact with the ground and a ...

Very good, Glenn. An FAQ section is something the forum should have. In number 2, you could also mention the need to use the File Locations option to store the changed template in a non-installation folder to prevent it being overwritten by an update or upgrade. Also to use the Default Templates option.
