

financial engineering derivatives and pdf

In finance, a derivative is a contract that derives its value from the performance of an underlying entity. This underlying entity can be an asset, index, or interest rate, and is often simply called the "underlying". Derivatives can be used for a number of purposes, including insuring against price movements (hedging), increasing exposure to price movements for speculation or getting access ...

Derivative (finance) - Wikipedia

A financial transaction tax is a levy on a specific type of financial transaction for a particular purpose. The concept has been most commonly associated with the financial sector; it is not usually considered to include consumption taxes paid by consumers.. A transaction tax is not a levy on financial institutions per se; rather, it is charged only on the specific transactions that are ...
