green building materials pdf

Green building (also known as green construction or sustainable building) refers to both a structure and the application of processes that are environmentally responsible and resource-efficient throughout a building's life-cycle: from planning to design, construction, operation, maintenance, renovation, and demolition.

Green building - Wikipedia

The global green building materials market size was estimated at USD 192.3 billion in 2016, growing at a CAGR of 11.2% over the forecast period. Expanding construction activities and increasing government initiatives for the implementation of environmental-friendly and energy-efficient building standards is expected to drive growth
