

histology and cell biology pdf

Histology, also microanatomy, is the study of the anatomy of cells and tissues of plants and animals using microscopy. It is commonly studied using a light microscope or electron microscope, the specimen having been sectioned, stained, and mounted on a microscope slide. Histological studies may be conducted using tissue culture, where live animal cells are isolated and maintained in an ...

Cell biology (also called cytology, from the Greek $\kappa\upsilon\tau\omicron\varsigma$, kytos, "vessel") is a branch of biology that studies the structure and function of the cell, which is the basic unit of life. Cell biology is concerned with the physiological properties, metabolic processes, signaling pathways, life cycle, chemical composition and interactions of the cell with their environment.
