HYDROGEN SULFIDE IN DRINKING WATER Causes and Treatment Alternatives Mark L. McFarland and T. L. Provin* * Associate Professor and Extension Water Quality Coordinator and Assistant Professor and Extension Soil Chemist,

HYDROGEN SULFIDE IN DRINKING WATER

Hydrogen sulfide gas (H₂S) can occur in wells anywhere in Minnesota, and gives the water a characteristic rotten egg taste or odor. This page provides basic information about hydrogen sulfide gas and sulfur bacteria and discusses actions that you can take to minimize their effects.

Hydrogen Sulfide and Sulfur Bacteria in Well Water - EH

Up to 75 mg/l hydrogen sulfide Continuous chlorination using an automatic chemical feed pump can effectively remove medium to high levels of hydrogen sulfide (Fig. 4).

Sometimes hot water will have a "sour" smell,

Hydrodesulfurization (HDS) is a catalytic chemical process widely used to remove sulfur (S) from natural gas and from refined petroleum products, such as gasoline or petrol, jet fuel, kerosene, diesel fuel, and fuel oils. The purpose of removing the sulfur, and creating products such as ultra-low-sulfur diesel, is to reduce the sulfur dioxide (SO₂) emissions that result from using those fuels ...

Hydrodesulfurization - Wikipedia

Oceanic anoxic events or anoxic events (anoxia conditions) were intervals in the Earth's past where portions of oceans become depleted in oxygen (O₂) at depths over a large geographic area. During some of these events, euxinia, waters that contained H₂S hydrogen sulfide, developed. Although anoxic events have not happened for millions of years, the geological record shows that they happened ...

APPEARANCE: Colorless or pale blue liquid below 78°F (25.6°C), colorless gas above 78°F (25.6°C).; DESCRIPTION: Hydrogen cyanide (AC) is a systemic chemical asphyxiant. It interferes with the normal use of oxygen by nearly every organ of the body. Exposure to hydrogen cyanide (AC) can be rapidly fatal.

Biorem offers biological solutions for the removal of odors, H₂S, VOCs and HAPs. Our systems can treat air flows from as little as 100 cfm to greater than 500,000 cfm of air and are available in many sizes, configurations, and options from our smaller integrated modular units to our larger custom designed field erected system.

Product Solutions | BIOREM

Boron fire, tidier than hydrocarbons', abler, is less easily lit. Hydrogen, in principle still lighter, ignites very easily ... Boron: A Better Energy Carrier than Hydrogen? ... while with boron the easy part is the handling. If drivers send slabs of (even less ignitable!) boron across the Earth, and get back boron, both forms' manageability helps this energy tap be efficient.
