Hydrology (from Greek: ὕδωρ, "h<sub>2</sub>O", meaning "water"; and ἥδρα, "h<sub>2</sub>O", meaning "study") is the scientific study of the movement, distribution, and quality of water on Earth and other planets, including the water cycle, water resources and environmental watershed sustainability. A practitioner of hydrology is a hydrologist, working within the fields of earth or environmental ...

Hydrology and Water Resources. As the world enters the 21st Century, it faces many challenges, above all that of establishing a sustainable way of life that would not threaten future generations.

### **Hydrology and Water Resources Programme (HWRP) | WMO**

Water resources are natural resources of water that are potentially useful. Uses of water include agricultural, industrial, household, recreational and environmental activities. All living things require water to grow and reproduce. 97% of the water on the Earth is salt water and only three percent is fresh water; slightly over two thirds of this is frozen in glaciers and polar ice caps.
