The phytochemical screening of crude methanolic extracts of leaf and bark samples of *G. velutinus* revealed the presence of some secondary metabolites such as alkaloids, steroids and cardiac glycosides as shown in Table 1. Tannins were detected in the leaf extract but not in the bark extract of *G. velutinus*. The phytochemical compounds detected are known to have medicinal importance.

Abstract. *Gymnema sylvestre* (Asclepiadaceae), popularly known as "œgurmar" for its distinct property as sugar destroyer, is a reputed herb in the Ayurvedic system of medicine. The phytoconstituents responsible for sweet suppression activity includes triterpene saponins known as gymnemic acids, gymnemasaponins, and a polypeptide, gurmarin.

Use: Spathulenol isolated from the herbs of *Salvia sclarea*. It shows the capacity to inhibit proliferation in the lymphocytes, inducing apoptosis in these cells possibly through a caspase-3 independent pathway.

Oxidative stress and inflammation are interlinked processes. The aim of the study was to perform a phytochemical analysis and to evaluate the antioxidant and anti-inflammatory activities of ethanolic *Mahonia aquifolium* flower (MF), green fruit (MGF), and ripe fruit (MRF) extracts. Plant extract chemical composition was evaluated by HPLC. A DPPH test was used for the in vitro antioxidant activity.

Curcumin is a constituent (up to 145%) of the traditional medicine known as turmeric. Interest in the therapeutic use of turmeric and the relative ease of isolation of curcuminoids has led to their extensive investigation. Curcumin has recently been classified as both a PAINS (pan-assay interference compounds) and an IMPS (invalid metabolic panaceas) candidate.

Flavonoids (or bioflavonoids) (from the Latin word flavus meaning yellow, their color in nature) are a class of plant and fungus secondary metabolites.. Chemically, flavonoids have the general structure of a 15-carbon skeleton, which consists of two phenyl rings (A and B) and a heterocyclic ring (C). This carbon structure can be abbreviated C6-C3-C6.
