There are two interrelated concepts with prototype in JavaScript: First, every JavaScript function has a prototype property (this property is empty by default), and you attach properties and methods on this prototype property when you want to implement inheritance. This prototype property is not enumerable; that is, it isn't accessible in a for/in loop.

Most skin cancers are preventable. As they are commonly induced by ultraviolet light, avoidance of excessive sun exposure combined with the use of appropriate clothing and a good sunscreen lotion (SPF 15 or higher in a substantive base that does not easily wash off by sweat or swimming) is recommended.
