Kanban (看板) (signboard or billboard in Japanese) is a scheduling system for lean manufacturing and just-in-time manufacturing (JIT). Taiichi Ohno, an industrial engineer at Toyota, developed kanban to improve manufacturing efficiency. Kanban is one method to achieve JIT. The system takes its name from the cards that track production within a factory. For many in the automotive sector Kanban ...

### **Kanban - Wikipedia**

Kanban is a lean method to manage and improve work across human systems. This approach aims to manage work by balancing the demands with available capacity, and improving the handling of system level bottlenecks.

### **Kanban (development) - Wikipedia**

A kanban card must contain the number of units (items, pounds, kits, etc.) that need action. It also likely contains a variety of other information that clearly conveys what must be done. A kanban card often has a place to write the date it was turned in, or "dropped", and when it is due. The ...
