### **BS 2971-1991.pdf | Welding | Pipe (Fluid Conveyance)**

Welding is a core activity in the fabrication factory, undertaken by skilled, qualified operatives working to a welding quality management system under the control of a Responsible Welding Coordinator. It is used to prepare joints for connection in the shop and on site, and for the attachment of other fixtures and fittings.

>Welds that Pass Inspection < While the goal is to join two pieces of metal, welding often involves a code specifying how the work should be performed.

### **Code Welding - Welds that Pass Inspection**

Plastic welding is welding for semi-finished plastic materials, and is described in ISO 472 as a process of uniting softened surfaces of materials, generally with the aid of heat (except solvent welding). Welding of thermoplastics is accomplished in three sequential stages, namely surface preparation, application of heat and pressure, and cooling.

### **ASME Boiler and Pressure Vessel Code with Addenda**

The ESM defines the minimum technical requirements for the design, fabrication, construction, commissioning, repair, and replacement of both new and existing systems, structures, and components (SSCs), including both maintenance and modification, for programmatic and facility work. They do not apply retroactively (forcing changes to existing SSCs that are not being touched).
