Reliable, High Performance TCP/HTTP Load Balancer. Quick News November 26th, 2017: HAProxy 1.8.0 released. One year after 1.7.0, we're pleased to announce release 1.8 ...

### HAProxy - The Reliable, High Performance TCP/HTTP Load

I've had several customers ask me what options they have for providing redundancy / high availability / load balancing for their VMware View Connection Servers and Security Servers. VMware View does not provide its own load balancing functionality. Many are smaller customers without any existing load balancers in place, or want something they can use during a [€]

With the addition of WebSocket channels in Zato 3.0, a question arises of how to combine both HTTP and WebSocket channels in Zato environments. This article shows how a Docker container running in ...

### Load-Balancing Zato HTTP and WebSockets with Docker in AWS

En informatique, la répartition de charge (en anglais : load balancing) est un ensemble de techniques permettant de distribuer une charge de travail entre différents ordinateurs d'un groupe. Ces techniques permettent à la fois de pondre une charge trop importante d'un service en la répartissant sur plusieurs serveurs, et de réduire l'indisponibilité potentielle de ce service que ...

Get access to the core Stardog development team in real-time via voice or chat. Let us help you get the most from Stardog, 24/7. Our core team has more semantic graph application and tool development experience than any other team on the planet.

## Stardog 6: The Manual

In computer networks, a proxy server is a server (a computer system or an application) that acts as an intermediary for requests from clients seeking resources from other servers. A client connects to the proxy server, requesting some service, such as a file, connection, web page, or other resource available from a different server and the proxy server evaluates the request as a way to ...
