Mathematical Statistics with Applications was written for use with an undergraduate 1-year sequence of courses (9 quarter- or 6 semester-hours) on mathematical statistics. The intent of the text is to present a solid undergraduate foundation in statistical theory while providing an indication of the relevance and importance of the theory in solving practical problems in the real world.

**Mathematical Statistics with Applications 7th Edition**

independently of their source, the corresponding number in Mathematical Statistics is accompanied with each exercise number for convenience of instructors and readers who also use Mathematical Statistics as the main text. For example, Exercise 8 (#2.19) means that Exercise 8 in the current book is also Exercise 19 in Chapter 2 of Mathematical Statistics.
