Technology Diversity Rules the MEMS Packaging Landscape Christophe Zinck Jean-Marc Yannou Charles Lee ASE Europe May 22, 2014 12th MEPTEC MEMS Technology Symposium

## **Technology Diversity Rules the MEMS Packaging Landscape**

MEMS, Micro-Electro-Mechanical Systems, is the ultimate enabling technology for integration of almost any phenomena - motion, light, sound, chemical detection, radio waves and computation, but on a single chip.

## **MEMS PACKAGING ISSUES and MATERIALS**

MEMS Packaging discusses the prevalent practices and enabling techniques in assembly, packaging and testing of microelectromechanical systems (MEMS). The entire spectrum of assembly, packaging and testing of MEMS and microsystems, from essential enabling technologies to applications in key industries of life sciences, telecommunications and aerospace engineering is covered.

STMicroelectronics LSM6DS3 6-Axis MEMS IMU 2015 teardown reverse costing report published by Yole Development

### **STMicroelectronics LSM6DS3 6-Axis MEMS IMU 2015 teardown**

Description: New MEMS challenges: Yesterday, the main MEMS challenges were size decrease, which in turn led to price decrease then volume growth. Today, trends are different. They are: importance of user case (start with the definition of an application), fusion different sensors with software and power decrease (which paradoxically is linked to an chip size increase because of the ASIC).
