ABSTRACT. This paper discusses Herbert A. Simon's conception of rationality in two of its principal general definitions: bounded rationality and procedural rationality.

### **Herbert A. Simon and the concept of rationality**

Rationality is the quality or state of being rational "that is, being based on or agreeable to reason. Rationality implies the conformity of one's beliefs with one's reasons to believe, and of one's actions with one's reasons for action. "Rationality" has different specialized meanings in philosophy, economics, sociology, psychology, evolutionary biology, game theory and political science.

The term homo economicus, or economic man, is a caricature of economic theory framed as a "mythical species" or word play on homo sapiens, and used in pedagogy. It stands for a portrayal of humans as agents who are consistently rational and narrowly self-interested, and who usually pursue their subjectively-defined ends optimally.. Generally, homo economicus attempts to maximize utility as a ...

Box and Cox (1964) developed the transformation. Estimation of any Box-Cox parameters is by maximum likelihood. Box and Cox (1964) offered an example in which the data had the form of survival times but the underlying biological structure was of hazard rates, and the transformation identified this.
