The P300 (P3) wave is an event related potential (ERP) component elicited in the process of decision making. It is considered to be an endogenous potential, as its occurrence links not to the physical attributes of a stimulus, but to a person's reaction to it. More specifically, the P300 is thought to reflect processes involved in stimulus evaluation or categorization.

### **P300 (neuroscience) - Wikipedia**

Our vascular neurosurgery program also performs mechanical thrombectomy – an advanced interventional procedure available to acute ischemic stroke patients.

### **Children's Program - Wascana Rehabilitation Centre**

The Wascana Rehabilitation Centre provides comprehensive medical rehabilitation programs for adults and children, as well as specialized long-term care.

### **Wascana Rehabilitation Centre - Regina Qu'Appelle Health**

Generally there are three treatment stages for stroke: prevention, therapy immediately after the stroke, and post-stroke rehabilitation. Therapies to prevent a first or recurrent stroke are based on treating an individual's underlying risk factors for stroke, such as hypertension, atrial fibrillation, and diabetes.
