Chapter 23: Image Formation & Display. Images are a description of how a parameter varies over a surface.  
For example, standard visual images result from light intensity variations across a two-dimensional plane.

History. The filter is named after Hungarian  $\text{\AA}migr\text{\AA}$  Rudolf E. K\u00e1lm\u00e1n, although Thorvald Nicolai Thiele  
and Peter Swerling developed a similar algorithm earlier. Richard S. Bucy of the University of Southern  
California contributed to the theory, leading to it sometimes being called the Kalmanâ€”Bucy filter.

1. Introduction. Brain Computer Interface (BCI) technology is a powerful communication tool between users  
and systems. It does not require any external devices or muscle intervention to issue commands and  
complete the interaction .

Fundamentally, there are two types of control loops: open loop control and closed loop (feedback) control.  
Control theory is concerned only with closed loop control.

### **Control theory - Wikipedia**

Decision making under risk is presented in the context of decision analysis using different decision criteria for  
public and private decisions based on decision criteria, type, and quality of available information together with  
risk assessment.

### **Tools for Decision Analysis - ubalt.edu**

The noncommutativity of the momentum components, arising from spacetime torsion coupled to spin,  
replaces the integration over the momentum in loop Feynman diagrams with the summation over the  
momentum eigenvalues.
