radio telemetry systems and the important ones outlined together with the challenges associated with radio. A brief overview of satellite and microwave systems is given for completeness, followed by performance analysis. A discussion on radio telemetry systems would not be complete without sketching out the key issues of SCADA systems and alarm management.

Telemetry radio systems are normally configured as a fixed base station that obtains information from another fixed station at a remote site. The FCC has allocated certain frequencies that can be used for fixed operation. There are certain frequencies available in the VHF band, UHF band and 900 MHz band for this type of operation.
