

quick response manufacturing by pdf

The Danko Quick Attack Apparatus works great in those tough to reach areas, such as brush and wildland fires that are inaccessible with a larger fire apparatus. At the same time, the spacious compartments ensure adequate storage for bulky first response and advanced life saving equipment. The vehicle features an aluminum body with a mounted skid unit.

Quick Attack | Danko Emergency Equipment - Fire Apparatus

History. The QR code system was invented in 1994 by the Japanese company Denso Wave. Its purpose was to track vehicles during manufacturing; it was designed to allow high-speed component scanning. QR codes are now used in a much broader context, including both commercial tracking applications and convenience-oriented applications aimed at mobile-phone users (termed mobile tagging).
