GRE BIOCHEMISTRY TEST PRACTICE BOOK - ETS Home

Water is the chemical substance with chemical formula H₂O; one molecule of water has two hydrogen atoms covalently bonded to a single oxygen atom. Water is a tasteless, odorless liquid at ambient temperature and pressure, and appears colorless in small quantities, although it has its own intrinsic very light blue hue. Ice also appears colorless, and water vapor is essentially invisible as a gas.

Scientific studies on photocatalysis started about two and a half decades ago. Titanium dioxide (TiO₂), which is one of the most basic materials in our daily life, has emerged as an excellent photocatalyst material for environmental purification. In this review, current progress in the area of TiO₂ photocatalysis, mainly photocatalytic air purification, sterilization and cancer therapy are ...
