In statistics, inter-rater reliability (also called by various similar names, such as inter-rater agreement, inter-rater concordance, interobserver reliability, and so on) is the degree of agreement among raters. It is a score of how much homogeneity, or consensus, there is in the ratings given by various judges. In contrast, intra-rater reliability is a score of the consistency in ratings given ...

Course Descriptions. Applied Regression Analysis for Evaluators. Instructor: Gary T. Henry, PhD Description: Evaluators often face the situation where program outcomes vary across different participants and they want to explain those differences. To understand the contribution of the program to the outcomes, it is often necessary to control for the influence of other factors.
