You can use Griess reagent assay which is based on colorimetric approach. To do that, you even don't need a kit and could prepare all the needed reagents in your lab.

### **Nitric Oxide Assay? - ResearchGate**

Oxidative stress and inflammation are interlinked processes. The aim of the study was to perform a phytochemical analysis and to evaluate the antioxidant and anti-inflammatory activities of ethanolic Mahonia aquifolium flower (MF), green fruit (MGF), and ripe fruit (MRF) extracts. Plant extract chemical composition was evaluated by HPLC. A DPPH test was used for the in vitro antioxidant activity.

Oxygen is a chemical element with symbol O and atomic number 8. It is a member of the chalcogen group on the periodic table, a highly reactive nonmetal, and an oxidizing agent that readily forms oxides with most elements as well as with other compounds. By mass, oxygen is the third-most abundant element in the universe, after hydrogen and helium. At standard temperature and pressure, two atoms ...

Soil is a mixture of organic matter, minerals, gases, liquids, and organisms that together support life. Earth's body of soil is the pedosphere, which has four important functions: it is a medium for plant growth; it is a means of water storage, supply and purification; it is a modifier of Earth's atmosphere; it is a habitat for organisms; all of which, in turn, modify the soil.

### **Soil - Wikipedia**

A roof with high solar reflectance (the ability to reflect sunlight) and high thermal emittance (the ability to radiate heat) remains cool in the sun, reducing demand for cooling power in air-conditioned buildings and increasing occupant comfort in unconditioned buildings.

### **Development of paints with infrared radiation reflective**

THE DEPENDENT VARIABLE MEASURING THE ALCOHOL CONCENTRATION IN WINE . The most common method is by redox titration. In this analysis, you add an excess of standardized acidified potassium dichromate solution to the wine which converts the ethanol to ethanoic (acetic) acid.
