Voltammetry is a category of electroanalytical methods used in analytical chemistry and various industrial processes. In voltammetry, information about an analyte is obtained by measuring the current as the potential is varied. The analytical data for a voltammetric experiment comes in the form of a voltammogram which plots the current produced by the analyte versus the potential of the ...

Cyclic voltammetry (CV) is a type of potentiodynamic electrochemical measurement. In a cyclic voltammetry experiment, the working electrode potential is ramped linearly versus time. Unlike in linear sweep voltammetry, after the set potential is reached in a CV experiment, the working electrode's potential is ramped in the opposite direction to return to the initial potential.

The scanning electrochemical microscope (SECM) was introduced in 1989 as an instrument that could examine chemistry at high resolution near interfaces. By detecting reactions that occur at a small electrode as it is scanned in close proximity to a surface, the SECM can be employed to obtain chemical reactivity images of surfaces and quantitative measurements of reaction rates.

Primary amine to primary alcohol Hello everyone. I have a question about "Primary amine to primary alcohol" I've tried that the primary amine add NaNO_2 and Ac_2O in AcOH for 17h , then used NaOMe to give primary alcohol .

Journal of Electroanalytical Chemistry | ScienceDirect.com

Now open for submissions, Electronic Structure is a new, multidisciplinary journal for the entire electronic structure community, bridging physics, chemistry, materials science, and biology All papers published in the first volume of the journal will be free to read throughout 2018.

IOPscience

- It is distributed four times a year. The first volume was published in september of 2010. - publishes high-level Communications, Research Articles and Mini-Reviews related to all field of electrochemical science and technology.

The "compound" which is set to become the drug molecule undergoes safety tests and a series of experiments to prove that it is absorbed in the blood stream, distributed to proper site of action in the body, metabolized sufficiently and demonstrates its non-toxicity thus, can be considered safe and successful.
