An Auslander-Reiten formula for complexes of modules is presented. This formula contains as a special case the classical Auslander-Reiten formula. The Auslander-Reiten translate of a complex is described explicitly, and various applications are discussed.

MINIMAL IDEMPOTENT ULTRAFILTERS AND THE AUSLANDER-ELLIS THEOREM ALEXANDER P. KREUZER Abstract. We characterize the existence of minimal idempotent ultrafilters (on N) in the style of reverse mathematics and higher-order reverse mathematics using the Auslander-Ellis theorem and a variant thereof.

The Performativity of Performance Documentation Philip Auslander Consider two familiar images from the history of performance and body art: one from the documentation of Chris Burden's Shoot (1971), the notorious piece for which the artist had a friend shoot him in a gallery, and Yves Klein's famous Leap into the Void (1960), which shows the ...

Auslander is a writer who grew up in a strict Orthodox Jewish home. This upbringing has apparently caused him to hold a very dark perspective on religion and God, as this short story collection by Auslander is filled

with stories representing all manner of negative aspects of religion, and the tension between our lives and our faith.

The Auslander-Reiten quiver of the quiver Q has indecomposable modules of the path algebra kQ of Q at its vertices. Gabriel's theorem [1] tells us that the Auslander-Reiten quivers of Dynkin type quivers are finite and well-behaved. However, the Auslander-Reiten quivers of Euclidean type quivers are infinite and much more complex, and less is known

AUSLANDER-GRUSON-JENSEN FUNCTOR ALEX MARTSINKOVSKY AND JEREMY RUSSELL Abstract.

The formalism of injective stabilization of additive functors is used to define a new notion of the torsion submodule of a module. It applies to arbitrary modules over arbitrary rings.

Abstract. Let R be a left and right Noetherian ring and C a semidualizing R -bimodule. We introduce a transpose $\text{Tr}_C M$ of an R -module M with respect to C which unifies the Auslander transpose and Huang's transpose, see Z.Y. Huang, On a generalization of the Auslander-Bridger transpose, Comm. Algebra 27 (1999), 5791–5812, in the two-sided Noetherian setting, and use $\text{Tr}_C M$ to develop further ...
