Protection and Distribution 1A to 6300A page 15 THREE-PHASE, SPLIT METERED DISTRIBUTION BOARDS Energy used for lighting and power can be metered separately.

Protection & Distribution 1A to - Terasaki

Figure 1 shows automatic transfer between two low-voltage utility supplies. Utility source 1 is the normal power line and utility source 2 is a separate utility supply providing emergency power. Both circuit breakers are normally closed. The load must be able to tolerate the few cycles of interruption while the automatic transfer device operates.

Automatic transfer switch (ATS) between two low-voltage

Packaged Cooling with Electric Heat Rooftop Units

Description. The circuit diagram present here is that of a street light that automatically switches ON when the night falls and turns OFF when the sun rises. In fact you can use this circuit for implementing any type of automatic night light. The circuit uses a Light Dependent Resistor (LDR) to sense the light. When there is light the resistance of LDR will be low.
